■ New Delhi, India

## PROFESSIONAL SUMMARY

Accomplished Senior DevOps & Platform Engineer with 6+ years of hands-on experience architecting, automating, and scaling production cloud infrastructure on AWS and Kubernetes. Specialist in Infrastructure as Code (Terraform, Ansible), automated GitOps CI/CD pipelines (ArgoCD, GitHub Actions, Jenkins), high-availability Linux system administration, and zero-trust DevSecOps security. Track record of optimizing infrastructure costs by up to 35% while maintaining 99.99% service availability.

## CORE TECHNICAL COMPETENCIES

| | |
|---|---|
| **Cloud & Infrastructure:** | AWS (EKS, EC2, VPC, IAM, S3, RDS, CloudFront, Route53), GCP, Hybrid Cloud Architecture |
| **Containers & GitOps:** | Kubernetes, Docker, Helm, ArgoCD, EKS Cluster Management, Service Mesh (Istio) |
| **Infrastructure as Code:** | Terraform, Terragrunt, Ansible Playbooks, CloudFormation, Packer |
| **CI/CD & DevSecOps:** | GitHub Actions, Jenkins Pipelines, GitLab CI, Trivy, SonarQube, Vault Secret Manager |
| **Observability & SRE:** | Prometheus, Grafana, ELK Stack (Elasticsearch, Logstash, Kibana), OpenTelemetry, Datadog |
| **Languages & Scripting:** | Python, Bash/Shell Scripting, Go, YAML, SQL, HCL |

## PROFESSIONAL EXPERIENCE

### Lead DevOps & Platform Engineer

*2023 – Present | New Delhi, India*

**DevOps Academy & Cloud Solutions**

- Architected multi-region AWS EKS clusters using Terraform and ArgoCD GitOps, reducing release deployment cycles by 65%.
- Formulated automated CI/CD pipelines with GitHub Actions and Helm charts, implementing canary releases and automated rollback capabilities.
- Implemented enterprise observability suites using Prometheus, Grafana, and Loki, establishing SLO/SLI tracking and reducing MTTR by 45%.
- Spearheaded AWS infrastructure cost optimization initiatives, saving over 35% monthly expenditure using Spot instances and auto-scaling.

### Senior Infrastructure Engineer

*2021 – 2023 | Remote*

**Enterprise Tech Systems**

- Successfully migrated legacy monolithic workloads into containerized Kubernetes microservices on AWS EKS with zero customer downtime.
- Developed reusable Terraform HCL modules for automated provisioning of VPC networking, IAM security policies, and PostgreSQL RDS clusters.
- Enforced DevSecOps security policies by integrating HashiCorp Vault for secrets management and Trivy for container image vulnerability scanning.

### DevOps Engineer

*2018 – 2021 | New Delhi, India*

**Cloud Systems Inc**

- Automated Linux server configuration management and security hardening across 200+ enterprise nodes using Ansible playbooks.

- Built declarative Jenkins CI/CD pipelines supporting automated unit testing, integration tests, and multi-environment deployments.

## CERTIFICATIONS

- **Certified Kubernetes Administrator (CKA)** – CNCF
- **AWS Certified Solutions Architect – Associate** – AWS
- **HashiCorp Certified: Terraform Associate** – HashiCorp
- **Red Hat Certified System Administrator (RHCSA)** – Red Hat

## EDUCATION & KEY PROJECTS

- **B.Tech in Computer Science & Engineering**

  *Subharti Institute of Technology & Engineering*
- **DevOps Academy Interactive LMS**: Built full-stack LMS & Daily Learning Tracker with React, Express & PostgreSQL.
- **Multi-Cluster GitOps Engine**: Production ArgoCD GitOps blueprint managing 10+ Kubernetes clusters.
